MED900	Educational Inquiry	This course introduces participants to the fundamental processes involved in conducting research such as formulating research questions, writing a review of the literature by synthesizing empirical studies, understanding various methodological approaches, collecting and interpreting research data. Participants in this course will have opportunities to develop the skills, knowledge and strategies needed to read, interpret, and evaluate the quality of research reports. In addition, participants will gain a critical understanding of quantitative, qualitative, and combined research approaches.	4
MED902	Integrative Project	This capstone course requires participants to identify an education issue which forms the focus of inquiry, locate and read the most relevant literature to generate suggested potential solution to address the problem. The solution should show evidence that they are able to take the available information and restructure it in an appropriate way to deal with the issue.	2
MDP901	Social and Emotional Development and Assessment	This course is one of the two core (required specialization) modules in the Master of Education (Developmental Psychology) programme. The course contains major and classic social and emotional development theories that are fundamental to the participants before they take on other more specialized courses in the programme. It also introduces how to assess childrens social and emotional development.	4
MDP902	Children Cognitive Development and Assessment	Childrens cognitive development is the emergence of the ability to process information, think, and understand. Understanding childrens cognitive development is essential for curriculum development, effective teaching, and good policy making.	4
MDP903	Counselling Children and Adolescents	Teachers and other helping professionals who might not have the knowledge about basic counselling concepts and skills are often at a loss when faced with children or adolescents who need psycho-social and emotional support. This course provides one with information and skills needed to do basic counselling in settings such as schools and other educational centers.	4

MDP904	Motivation, Volition and Learning-in-Action	This course is designed to empower teachers, coaches, supervisors or parents to motivate their charges and to develop their volition to love, to will, to think and to make personal improvements so that they become happy and well-adjusted members of the community. The course examines biological-psychological research and theories related to enhancing motivation and volition in young and adult learners. It helps participants to understand why some renowned persons drive themselves to success while others seem to remain in mediocrity. Participants will engage in research practices and reflections as they relate their experiences to theories and hypotheses in daily practices based on the framework of Knowledge-Volition-Action.	4
MDP905	Individual Differences and Learning	The proposed changes are a response to student feedback that the course scope be broadened. The expanded scope of content and the revised assessment modes increase flexibility within the course to better meet participants individual needs and interests. The changes also better align the course with the global literature on individual differences and strengthen its alignment with international benchmarks for similar courses. We expect that students will find the course builds their capacity to create more responsive learning environments to cater to a broader range of individual differences. We anticipate that the changes will also make the course more attractive to those who teach in non-educational settings. The changes may strengthen the competitiveness of the course and attract more applications to the MDP programme.	4
MDP906	Personality and Attitude Assessment	This course covers the non-cognitive aspects of educational assessment. Non-cognitive attributes such as attitudes, interests, and personality are important to education for the 21st century. The course complements those of cognitive assessments, to provide the breadth of knowledge for a MEd (Educational Assessment) specialist.	4

MDP907	How to Nurture Creative and Happy Learners	<p>It has been said that we live in the VUCA world Volatile, Uncertain, Complex, and Ambiguous. Creative individuals will cope well in the VUCA world, due to their capacity to think of original solutions to complex and challenging problems. At the same time, via incremental improvement or radical transformation of the VUCA world they live in, creative individuals can live happy, enriched and meaningful lives in society.</p> <p>This module infuses its participants with relevant KSAOs (Knowledge, Skills, Abilities and Others) to nurture creative and happy learners in the Singapore context. It achieves this goal by immersing participants in the theoretical and empirical research on creativity and happiness. By mastering this psychological domain of knowledge, participants will become skillful facilitators of creative and happy learners in the classroom, and thereby prepare their students for living and thriving in the VUCA world.</p>	4
MDP908	Evaluation of Programs in Schools and Community Organizations	<p>It is important that stakeholders are able to know if current programmes in schools and organisations are effective and are bringing about the intended outcomes as planned. Periodic monitoring is also important to ensure that the standard and quality of the programmes remain robust. This course is therefore designed to help practitioners learn the skills of programme evaluation to enable them to appraise educational, social and community programmes in their organisations in a scientific and systematic manner - one that is grounded in the science of programme evaluation.</p>	4

MDP909	Assessment and Development of 21st Century Competencies	The 21st century is often described as a VUCA world one that is volatile, uncertain, complex, and ambiguous. With new demands coming from the 21st workplace, it is thus imperative for educators in various educational institutions to develop students capacities to match the needs of the students future workplace. This thus indicates an imperative need to change the way educators craft their lessons and learning tasks so as to provide students with ample opportunities to gain authentic learning experiences and enable the transfer of relevant knowledge and skills from their classrooms to solve real world problems.	4
MDP910	Theory, Research and Practice in Teaching and Learning	This course provides a detailed analysis of contemporary learning theories and practices as they relate to education. It embarks on a detailed investigation of major research in educational psychology focusing on learning cognition. Historically, the field of educational psychology gained from a series of learning theories, including behaviourism, social cognitive theory, information processing, and constructivism. In this course, these theories are examined in depth. The question, how do humans learn (effectively)? is at the heart of such theories, and participants are invited to construct and reconstruct their personal theories of learning throughout the course. However, modern day educational psychologists face questions that are considerably more varied and diverse than simply, what constitutes learning? Increasingly, they are concerned with a variety of topics, including knowledge building, the role of working memory, the importance of emotions and student well-being, encouraging innovation and critical thinking, incorporating learners with special needs, as well as engaging adult learners. In considering these topics, a common theme continues to be how psychological principles can illuminate processes of learning and teaching. This course thus considers how theory, research, and practice inform each other in order to improve the efforts of educators.	4

MDP911	Understanding Learner Motivation: Theory, Research and Practice	This course provides participants with an in-depth understanding of the theoretical underpinnings of learner motivation. The course covers an overview of the central theories of motivation, with a focus on how these can be applied in the classroom context to foster learning. In doing so, participants will be invited to explore issues related to the motivation of learner, the factors affecting learner motivation, and how this motivation and its underpinning factors can be assessed. Further, the strategies that could be employed to promote motivation will also be explored. Participants will be required to carry out a critical review of existing literature on motivational constructs of their interest, which leads to the development of a research proposal.	4
